

Savage Product Safety Recall Notice

October 2013

It has recently been brought to Savage's attention that the fitting of a particular style of navigation light mounting plate with our low split bow rail may be hazardous and a product safety recall has been implemented.

It has been determined that a small gap between the edge of the plate and the bow rail tube could act as a pinch point if someone's finger was forced into this space for any reason.

This rail and navigation light bracket was manufactured between November 2008 and February 2012, and of the more than 2,000 Savage boats completed during this time period it is estimated that 163 were fitted with this part.

Wherever possible, Savage is contacting potentially impacted customers directly to arrange free-of-charge rectification work to be carried out by the Savage dealer network.

Savage's Director of Sales and Marketing Damien Duncan said after the hazard was brought to Savage's attention the decision was made to act quickly and perform a recall on all boats that were fitted with this particular part.

'Savage values safety very highly and when the hazard was brought to our attention we immediately thought it best to err on the side of caution and have the product recalled.'

'We do apologise for any inconvenience we have caused to our customers however we do feel it is important to fix this potential problem as a precaution,' Damien said.

A list of serial numbers of potentially affected Savage boats can be accessed below. If you have not been contacted by Savage and you cannot locate your boat's serial number in the list provided, but believe your boat may be fitted with this specific navigation light mounting plate and bow rail combination, please contact your local Savage Dealer to arrange an inspection.

Please Scroll down to view the official recall notice and to view a complete list of serial numbers of affected Savage boats.

PRODUCT SAFETY RECALL

Telwater Pty Ltd - Savage Aluminium Boats Navigation Light Mounting Plate Sold at Savage dealers & other boat retailers nationally

PRODUCT DESCRIPTION:

Navigation light mounting plate situated within the bow rail and fitted to some Savage Aluminium boat models manufactured between 18 November 2008 and 6 February 2012. Refer to photo for style.

Not all boat models were affected.

A list of potentially affected boat HIN's is attached to the recall notice at www.recalls.gov.au and the Savage website <http://www.savageboats.com.au> for your reference. Enter the aluminium site.

DEFECT:

In some circumstances it may be possible for a person's finger to be caught between the edge of the navigation light mounting plate and the bow rail tube.

HAZARD:

If the defect occurs, the edge of the navigation light mounting plate may cause cuts or serious injury to the trapped finger.

WHAT TO DO:

Consumers should immediately stop using the boat and check the style of navigation light mounting plate against the example picture.

For further information customers should contact their nearest Savage dealer to arrange for inspection and rectification if necessary.

For further information

Please direct all calls and any queries concerning this recall to:

- your nearest Savage dealer; or
- email: recall@telwater.com.au
