

## MAKE FISHING DREAMS A REALITY IN THE NEW 455 JABIRU PRO

For a practical and durable boating option with superior design and stability, there is no going past the new 455 Jabiru Pro from Savage, one of the oldest names in boating.

Savage has been building some of the toughest aluminium boats for generations and the introduction of the new Jabiru Pro range keeps this reputation going strong.

The new 455 Jabiru Pro is set to become one of the most popular V-nosed punts on the market with a long list of standard features able to make fishing dreams a reality.

This new mid-sized model comes standard with a painted hull to add a touch of individuality and can even be optioned up to feature a unique vinyl wrap to really make others jealous.

The 3mm plate bottom sides and 2.50mm plate top sides are a stylish and modern update, while the new rod storage pocket with carpeted lid adds the practical convenience all fishermen desire.

The new 455 Jabiru Pro can be optioned up to be a hard core competition fishing boat says National Account Manager Cameron Wood, with the choice of adding a rear casting platform, live bait tank with tackle, storage bins and utility tray to the already standard front casting platform.

“This boat has all the features and options needed for any serious fishermen looking at taking on the competition while still being in a very affordable price bracket,” Cameron said.

A 60HP rating is more than enough power to satisfy anyone’s need for speed and a 70 litre fuel tank can also be included as an optional extra.

There is enough seating for four people including gear, with two fold down skipper seats and two rod holders included as standard.

If Savage’s reputation for having some of the toughest and durable boats on the water doesn’t satisfy, then a three year warranty on all Savage models should be that extra piece of mind needed.
