

Navigating in Savage's Punts and Dinghies is a breeze

Access to inshore estuaries and shallow lakes is a breeze with Savage's range of punts and dinghies, able to navigate stretches of water that many large boats cant.

Featuring seven models in the range, Savage's Punts and Dinghies are built with the same engineering integrity as that of larger boats with each model being built to last.

Savage Punts and Dinghies feature a remodelled transom design which is stylishly unique, and overall the boats are wider and deeper for better stability and safer for fishermen when casting.

Savage National Account Manager Cameron Wood said this range of Punts and Dinghies are perfect for allowing fisherman maximum flexibility on fishing adventures.

"Fishing enthusiasts don't need to look any further for the ideal small boat with the range of Punts and Dinghies Savage has on offer," he said.

"Savage Punts and Dinghies range can be used for casual weekend fishing fun or as a heavy duty fishing boat.

"With such a large range of options available for each boat, you can tailor your boat to fulfil every fishing need," he said.

All models are available with a wide range of great options including a transom step and rail for ease in getting in and out of the boat, bow and side rails which can be used for rod storage and a range of carpeted floors to suit your fishing needs.

Whether you're looking for the perfect fishing boat or a portable option to fit on your roof rack, Savage Punts and Dinghies have a boat to suit. To find out more about Savage's Punts and Dinghies range visit your local Savage dealer or visit the website www.savageboats.net.au
