

## Savage Piranha is the small boat with the big bite

The newest model addition to Savage, the 495 Piranha, is living up to its name as the small boat with big bite.

Available in two variations; the side console and centre console, the 495 Piranha is built on Savage's unique Maximum Ride Hull which provides efficient 'hole shot' performance, a smooth ride on the plane and improved stability when at rest.

This model isn't just about looks with Savage's rolled side deck design, a deep freeboard allows the 495 Piranha to venture out on fishing adventures with ease.

National Account Manager Cameron Wood says the 495 Piranha is a Savage model that fishing enthusiasts will get excited about.

"For a smaller model in the Savage range the 495 Piranha comes packed with features and storage, perfect for the serious fisherman.

"This powerful little model is great for offshore fishing and comes standard with a raised front casting platform for fishing ease.

"With an incredible amount of underfloor storage space and a unique Savage design there really is no escaping the 495 Piranha," he said.

The 495 Piranha is packed with features including a plumbed live bait tank, large plumbed kill tank, underfloor fuel tank, transom backrest for fishing in comfort, plenty of seating and the uniquely designed front casting platform.

To find out more about the boat with the bite contact your local Savage dealer or visit the Savage website [www.savageboats.com.au](http://www.savageboats.com.au)
